## PROJECTS

---

### CivicEye – Rural Local Problem Solving Platform

Aug 2025 – Present

*MongoDB · Express.js · React.js · Node.js · JWT Authentication*

- Built a mobile-first MERN platform enabling rural citizens to report local issues and connect with nearby service helpers.
- Implemented end-to-end features: authentication, issue reporting, booking system, user ratings, and location-based matching.
- Leading the project as Team Leader — managing sprints, technical reviews, and team coordination.

### AI Startup Builder — MERN + Generative AI

May 2026

*React.js · Node.js · Express.js · MongoDB · Generative AI APIs*

- Designed an AI-based startup planning platform that automates idea validation and business strategy generation.
- Integrated Generative AI APIs to produce startup analysis, competitor insights, and monetization models on demand.
- Built scalable REST APIs and a responsive frontend for seamless multi-device interaction.
